INFRASTRUCTURE SERVICES

2023 Capital Construction Program

PRE-CONSTRUCTION SURVEYS:

OZA Inspections Inc., a pre-construction survey company, has been hired by Alfidome Construction Niagara to conduct internal and external inspections of your home or business to establish the pre-construction condition prior to construction.

The information collected during these inspections will be submitted to the Town of Fort Erie. The information will be used to document the extent of cracking or other damage (if any) that exists prior to the commencement of construction. This information can then be used to determine the extent of the Contractor's responsibility in the unlikely event that damages occur to your property during construction.

These representatives will have identification with them. You will receive a notification letter from OZA Inspections Inc. if an inspection is required at your property.

WHAT TO EXPECT (During Construction):

Construction vehicles and related truck traffic is a necessary part of any construction project, so residents and businesses should expect a degree of noise, dust and short-term inconvenience.

Due to the scope of the work involved, roadway and parking restrictions will occur at times.

Detours and traffic signage will be adequately posted when required. Public services such as emergency services, garbage collection, and school buses will be advised of the construction works.

Driveway accessibility may be affected during construction however, every effort will be made to give you advance notice should this occur.

Area residents and businesses may experience some slight vibration due to the work being done. As a precaution, we recommend the removal of small, light objects from shelving and walls.

At times there may be some inconvenience to you during the construction period and we respectfully request your patience and co-operation during this period.

Please contact Kurtis Bottrell – Project Manager, Engineering should you have any additional questions or require further clarification.
