King Street Watermain, Storm Sewer and Road Reconstruction Project

The Town of Fort Erie has initiated engineering design for the King Street Watermain, Storm Sewer and Road Reconstruction project. The King Street project area extends 480m from Garrison Road in the north, to Albany Street the south.

The scope of work for this project includes the full reconstruction and upgrade of the existing road section to an urban cross-section including installation of storm sewer infrastructure, new sidewalks and concrete curb and gutter.

The timing of the project is driven by the aging infrastructure and the pending occupancy of Gilmore Lodge redevelopment on the east side of the street, with construction slated for Fall 2023.

Public consultation on the proposed design and getting feedback is an important component of the project. Due to the COVID-19 pandemic, the Town is moving away from traditional, in-house, public consultations and is transitioning to host our Public Consultations online. This online public consultation for the King Street Reconstruction will be conducted online through the Town's website. This online viewing is being held to provide interested parties with an opportunity to review the design and construction plans. This is a pre-approved Schedule A+ Municipal Class Environmental Assessment (MCEA) project. Those who wish to comment on the project will have an opportunity to contact the Project Team and discuss issues related to the project. The design drawings will be available for viewing and comment from:

Monday, August 21st, 2023 to Thursday, August 31st, 2023

at the following website:

<https://letstalk.forterie.ca/>

If you would like to learn more about the project and are unable to attend the PIC, please contact:

Ryan Lemay, C.E.T.,rcca
